Description
ITEM NO. UNIT ITEM DESCRIPTION QTY. UNIT COST TOTAL COST
EARLY PROCUREMENT ACTIVITY (EPA) CY 2026
1 monthly GENERAL PEST AND TERMITE CONTROL CY 2026 12 29,750.00 357,000.00
Comprehensive Termite and Pest Control Services
For Outsourced of Pest Control Service CY 2025-2026
SCOPE OF WORK AND METHOD APPLICATION:
Method of application: One Massive Treatment and Monthly Monitoring and re-treatment of termite occurrence
I. TERMITE CONTROL SERVICES
a. Wood Drenching
Whereby wooden portions of the structures (cabinet, ceiling, joists, trusses, jambs, and others) are drenched with anti-termite formulation in strategic areas using a power sprayer or injector. This is both preventive and curative measures guaranteed to control termite and lengthen the effective life strength of materials. Drilling holes in all door jams, baseboards, etc. (wood), that are infested and/or critical areas for termite infestation.
b. Trophallaxis Method
Chemical dusting of termite tunnels, crevices and others where there are signs of infestation of termite shall be directly treated. Application of power termiticide to all termites passageways, electrical conduits, cracks, crevices and other areas where there are possible signs of termite infestation.
II. REGULAR HOUSEHOLD PEST CONTROL
a. Cold Fogging Treatment
Shall be performed by the application of insecticides inside rooms, offices, corridors, and other areas by the use of an electro-mist aerosol machine which transform spray into microns (ultra-fine chemical droplets for an effective control of mosquitoes and flies and other flying insect pests.
b. Residual Spraying
Shall be treatment of residual pesticides to critical areas and breeding harboges of cockroaches, bedbugs, carpet beetles, ants and other crawling insect pest inside and outside building. Cockroaches bait shall be done through application of gel type of insecticides on areas where spraying is not possible or where there are heavy cockroaches problems
c. Rodent and Mice Control
Treatment by bait-laying of anti-coagulant preparation will be carried out in the premises especially on areas used as passageways of rats and mice. Shall be performed by the application of rat track powder and rat baits (anti-coagulant rodenticides) to all breeding avenues of rats and mice. When this baiting method shows sign of resistance of ineffectiveness, gluing, a non-poisoning adhesive shall be applied by attracting rats and mice to be trapped.
d. Crawling Insect/ Cockroach Control
Treatment by spraying or long residual gel formulation applied as bait spots will be carried out in the premises especially in the harborages and breeding places of cockroaches such as cracks, crevices, door hinges, drainages, under the sink, and other possible hiding places, Drawers and cabinets shall also be sprayed with residual chemicals.
e. Stray Cats
Catching of strays cats at hospital premises. Caught stray cats will be endorsed to EFMS-GSS to be forwarded to Barangay Karuhatan and to be given to Veterinary Services Office -Animal Control of Valenzuela City for proper care.
