

**BID BULLETIN NO. 1**  
**13 NOVEMBER 2025**

**Public Bidding No. VMC-2026-018**  
**SUPPLY AND DELIVERY OF VARIOUS LABORATORY SUPPLIES OF CY 2026**

Issued pursuant to Sec. 51.5 of the IRR of RA 12009 to clarify and/or amend certain provisions in the Bidding Documents issued for this project, considering the issues raised and clarifications made by the prospective bidders during the **Pre-bid Conference** held on November 13, 2025, likewise, respond to bidder's written queries received within the prescriptive period for filing.

<b>Posted in Bidding Documents</b>	<b>Amendment</b>
<b>HEMATOLOGY SECTION</b> For Fully-automated Hematology Analyzer (6-part diff) Reagent (free use of machine with complete set of computer and printer ; Result printout customizable to end-user's format; Can generate printout of summary of reports run daily as specified by end-user;LIS ready, can test other body fluids)the winning bidder should shoulder any expenses related to LIS connectivity. Throughput : 80-100 samples/hour in WB mode with autoloader, closed system. Should ran stat mode. Aspiration volume : minimum of at least 70-90ul in consideration of pedia and neonatal patients. Should generate 6 part differential including immature cells (must be FDA certified). Should be capable of running other body fluids (must be FDA certified) with volume aspiration of at least 70-90 ul. Should generate auto NRBC correction. Automated Reticulocyte count capable. Capable of platelet fluorescence. Control's shelf life must be at least 1 month upon delivery. Should be able to generate printable LJ chart of controls. Shall provide back up machine (6 part differential) that has sample aspiration of not more than 25-30 ul for neonatal patient. Should be capable of body fluids analysis (Must be FDA certified). All information and specification must have supporting documents. Automated registry of controls. Principle : Combination of Fluorescence Flow Cytometry and Electrical Impedance method with Quality Control Flagging. 24/7 after service required upon machine malfunction or failure. Set of reagents must consists of Diluent, Lysing reagents, staining reagents, controls. At least 500 test/set excluding controls and calibration running. LOT BID item no. 9	<b>HEMATOLOGY SECTION</b> For Fully-automated Hematology Analyzer (6-part diff) Reagent (free use of machine with complete set of computer and printer ; Result printout customizable to end-user's format; Can generate printout of summary of reports run daily as specified by end-user;LIS ready, can test other body fluids)the winning bidder should shoulder any expenses related to LIS connectivity.
